

AMENDMENTS TO THE CLAIMS

Kindly amend the claims as follows:

1. (currently amended) A method for provisioning a mobile device with a ~~one or more~~ mobile ~~applications~~ application, the method comprising the steps of:

deploying said mobile application as a web service ~~in~~ accessible via a Universal Description, Discovery and Integration (UDDI) UDDI directory; and

~~downloading said mobile applications from said UDDI directory by invoking said web service~~ invoking a mobile provisioning web service responsive to a request for said mobile application web service made using said UDDI directory, thereby causing said mobile application to be downloaded to said mobile device.

2. (currently amended) The method of claim 1 wherein said step of deploying comprises the steps of:

extending a web services Description Language (WSDL) ~~WSDL~~ template to define said mobile application, wherein said extending provides for wrapping said mobile application as said web service; and

publishing said WSDL defined mobile application in said UDDI directory.

3. (currently amended) The method of claim 1 ~~wherein said step of downloading comprises the steps of~~ and further comprising locating said mobile application web service in said UDDI directory.

4. (cancelled)

5. (currently amended) ~~[[A]] The method for provisioning one or more mobile applications, the method~~ according to claim 1 and further comprising the steps of:

receiving information relating to at least one mobile user; and

according to said information, personalizing ~~[[a]]~~ said mobile application to support said at least one mobile user, wherein ~~each~~ said ~~personalized~~ mobile application is ~~different~~ differently personalized for ~~each user~~ different mobile users; ~~and~~

~~downloading said personalized mobile application to a mobile device associated with said at least one user.~~

6. (original) The method according to claim 5, wherein said personalizing step comprises stamping said personalized mobile application according to said information relating to at least one mobile user.

7. (original) The method according to claim 5, wherein said personalizing step comprise receiving at least a user name and password.

8. (currently amended) A computer product readable by a machine, tangibly ~~embody~~ embodying a program of instructions executable by the machine to perform method steps, said product comprising:

a first code segment operative to deploy a mobile application as a web service ~~in~~ accessible via a UDDI directory; and

a second code segment operative to ~~download said mobile application from said UDDI directory by invoking said web service~~ invoke a mobile provisioning web service responsive to a request for said mobile application web service made using said UDDI directory, thereby causing said mobile application to be downloaded to said mobile device.

9. (original) The computer product of claim 8, further comprising:

a third code segment operative to extend a WSDL template to define said mobile application, wherein said extending provides for wrapping said mobile application as said web service; and

a fourth code segment operative to publish said WSDL defined mobile application in said UDDI directory.

10. (currently amended) The computer product of claim 8, further comprising a ~~fifth~~ third code segment operative to locate said mobile application web service in said UDDI directory.

11. (currently amended) ~~A computer product readable by a machine, tangibly embody a program of instructions executable by the machine to perform method steps, said product~~ The computer product of claim 8, further comprising:

a ~~first~~ third code segment operative to receive information relating to at least one mobile user;

a ~~second~~ fourth code segment operative to, according to said information, personalize a mobile application to support said at least one mobile user, wherein each said personalized mobile application is different for each user; and

a ~~third~~ fifth code segment operative to download said personalized mobile application to a mobile device associated with said at least one user.

12. (currently amended) The computer product of claim 11, wherein said ~~second~~ fourth code segment is operative to stamp said personalized mobile application according to said information relating to at least one mobile user.

13. (currently amended) The computer product of claim 11, wherein said ~~second~~ fourth code segment is operative to receive at least a user name and password.
